Mechanical Engineering Department

Ref: **VI/BOS-10/Mech./2017/**

Date: 20th September, 2017

**Points Discussed in Industrial Advisory Board (IAB) Meeting held on 20th September 2017,
in Mechanical Engineering Department:**

Head of the Mechanical department has discussed the structure for the B-Tech students.

Following are the point discussed after HOD's presentation:

- 1) Internship experience can be properly utilized by 'semester internships'.
- 2) Tie ups with Industries and having labs sponsored by them will be of advantage for the department. This also gives a sense of responsibility for the institutes to carry out active technical / research work.
- 3) Industries can be approached even for running regular courses by the industry experts. This can be at the institute of even at the industry site.
- 4) Organizing students conference to publish their work carried out during internship or during the semester project will enhance ability and technical writing skills of students.
